

WYK MINI SPILL KITS

These small “mini” Spill Cleanup Kits really pack a punch! They allow you to place one in many different places where small drips and spills could occur.

This makes it incredibly easy to keep the floor clean, dry and safe for both employees and visitors.

These shaker cartons are very efficient, limiting the amount of sorbent used producing less waste. Unlike the clay product, **WYK Super Sorbent** works instantly, requiring little time for the cleanup. Because it is so easy to do, people love to use it! They now take pride in having a clean, safe and dry work floor area!

This same scenario holds true whether it's an auto service garage, machine shop, printing presses or assembly lines. Each area can be efficiently and safely maintained with the **Mini Spill Kit Plan!**
